

D15 Transportation Sub-Committee Meeting Minutes

The survey closes on June 14th. I will check about getting responses with a date submitted indication so we can start reviewing survey answers now and only have to add new ones as we continue to get responses. We will ask for additional exports of survey data on 5/31, 6/7, and 6/15. Our next meeting is 6/20 so that does not give us much time between the survey close and our meeting, which is why we want the other data exports in between to be able to get a head start on analyzing the data. We currently have 191 responses, so there's a lot to go through.

OUR ASSIGNMENTS

Two people will analyze the responses to each survey question for basic themes. We will report out on these at our next meeting on 6/20. Please come prepared!

The assignments are:

- 1) Jeff and Kyle: "What do you love about the neighborhood?"
- 2) Rick and John Cox: "How might Highland improve over the next 10 years?"
- 3) Christina and Laurie: "What are the biggest challenges Highland faces over the next 10 years?"
- 4) Kathy and Heidi: "Specific suggestions for Transportation, Land Use, Housing, etc."
- 5) Andrew and John Hay: "How should Highland best prepare for new development over the next 10 years?"

We also discussed the six existing transportation-related goals in the current plan. Moving forward, our initial 5 goals are summarized as:

- 1) pedestrians
- 2) travel demand management and parking
- 3) bicycling
- 4) transit
- 5) safe and well-maintained infrastructure system

After we review the survey input, we can discuss if these five goal areas address everything or if we need any others.

And here's the survey link! surveyMonkey.com/r/highlandplan If you haven't taken it yet, please do by June 14th.

Heidi
